

SPRING

ENABLING CLEAN GROWTH

FOXWALKS SOLAR FARM

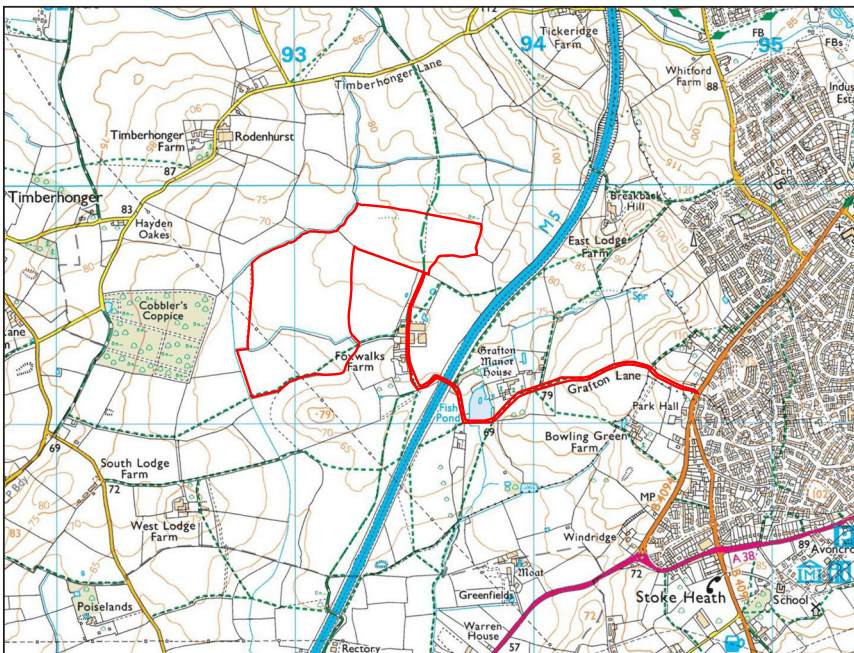

THANK YOU for choosing to discover more about our proposed solar project at Foxwalks farm – we hope you find the information we are presenting interesting and informative.

We have carefully selected this site at Foxwalks farm and in recent months we have conducted a range of studies to inform our planning proposal. These assessments cover a variety of subjects including ecology, landscape and visual, transport, hydrology and more. Our findings are presented in these pages.

We intend to submit a planning application shortly. Before we do, we'd like to learn your views on our proposal.

Once you have reviewed our information please take a moment to give your feedback by completing the survey which is linked below – you will find this link at the bottom of each of our presentation pages. You can also email us with comments or questions at begin@springche.com

LOCATION

STATISTICS

36 hectares of land - currently used for sheep grazing.

45 MW - the total installed capacity of the proposed site.

13,000 - the number of homes that can be powered by the site's annual output. *

8,000 tonnes - the amount of CO2 saved per year **

1 km - the distance between the solar farm and where it connects to the electricity grid.

6 - the average number of HGV journeys per day during the peak construction period. Site access will be via Grafton lane from the B4094.

*Based on OFGEM TDCVs decision letter January 2020, electricity profile class 1 meter in the Midlands of 3,145kWh per annum.

**UK Gov Greenhouse gas reporting: conversion factors 2022.
