

## PURTON SOLAR FARM WHAT YOU WILL SEE

An important piece of work that informs our planning proposal is the Landscape and Visual Impact Assessment (LVIA). Working with the planning team and Wiltshire Council, we identify the properties and the areas that are to be considered by the LVIA. Our Landscape Architect then assesses the impact our project may have.

Here is a selection of the pictures taken within the site looking towards the receptors and from without, looking towards the site, that will inform the landscape assessment.

**VP1** View west towards the mainline Stroud to Swindon railway.

**VP2** View north from Paven Hill.

**VP3** View south towards Purton.

**VP4** View north towards Bentham Lane.
